

ATTUS Technologies, Inc.

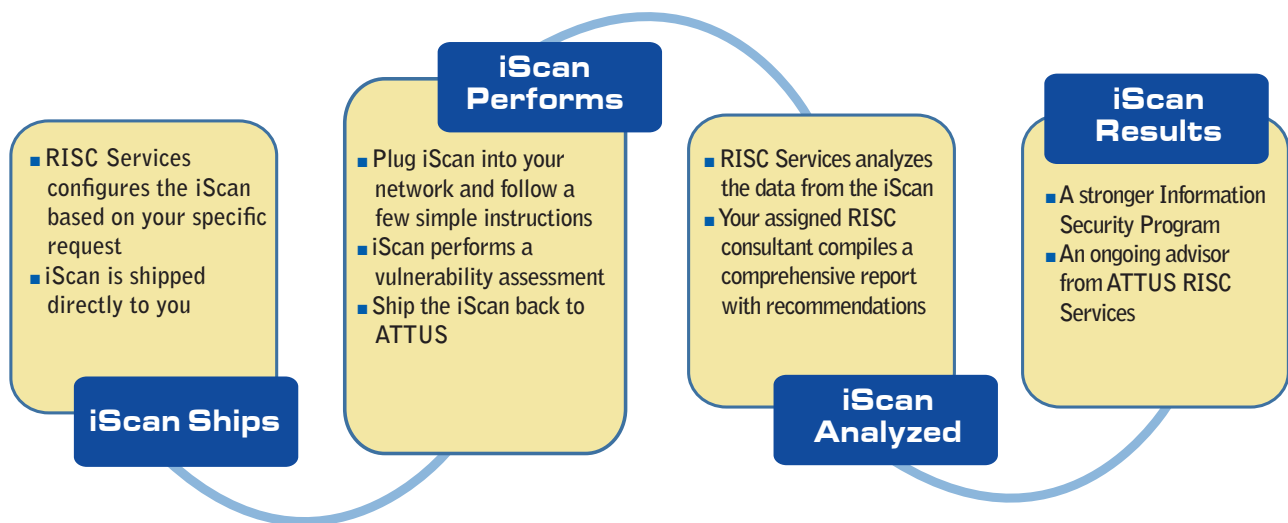

iScan

Remote Internal Vulnerability Assessment

The iScan from ATTUS RISC Services opens a new world of possibilities for your Information Security needs. Simple to use, cost effective and results oriented, the iScan performs a remote vulnerability scan of your entire network. It helps you detect potential threats and protect your business from unwanted network issues and intruders.

iScan Quickly and Efficiently Goes to Work for You

A Compact & Powerful Device

- Designed by the RISC experts at ATTUS
- Lightweight for easy shipping and handling
- Configured with the latest Information Security scanning tools
- Scans your network, including all software and hardware

A Remote & Affordable Approach

- Works independently within your network at your convenience
- Requires little effort from your staff
- Reduces the cost of traditional on-site scans
- Conducts a comprehensive vulnerability scan equivalent to an on-site RISC scan

Comprehensive Support & Results

- Your assigned RISC consultant advises you before, during and after the scan
- Detailed report provides written assessment of your network's stability and security
- iScan is supported by ATTUS' trusted technical team
