

Building Information Security Awareness throughout Your Institution

The Knowledge, Expertise and Reliability you've come to expect from an ATTUS RISC Services engagement is now available to your entire staff. Through our educational seminars your employees will learn the methods and means to strengthen your Information Security Program.

ATTUS Risk and Information Security Consulting (RISC) Services Group

presents

INFORMATION SECURITY

What is it? How can you help defend your institution?

Information Security isn't a one time event or project. It's an ongoing process that takes into account both the changes within your institution and the world of information espionage. Our RISC Services Consultants will provide your employees with a better awareness of the current dangers faced by your institution and a richer understanding of the critical role they play in protecting it.

Real-World Perspective on Information Security for Your Institution...

- What is at stake for your institution in the internet age?
- How can your institution protect itself?
- What are Information Security Best Practices and why do they work?
- How does bank regulation support your Information Security needs?
- What are the bad guys up to and what are their latest techniques?

Real-Time Prevention and Safety Measures for Your Employees...

- What is the difference between confidential and public information?
- Why are strong passwords so important?
- How to detect and respond to potential security breaches?
- Why is keeping your workspace secure a key part of your job?
- Why is it important to understand the enemy?

Delivered by a trusted advisor, on-site, off-site, via WebEx or wherever it's convenient for your staff.

Don't let your Information Security fall by the wayside. Reinforce it instead. ATTUS RISC Services Group Training Seminars. Knowledge equals prevention.
