

Sharing Our Knowledge with Your Employees for a Stronger, More Secure Institution

The Knowledge, Expertise and Reliability you've come to expect from an ATTUS RISC Services engagement is now available to your entire staff. Through our educational seminars your employees will learn the methods and means to strengthen your Information Security Program.

ATTUS Risk and Information Security Consulting (RISC) Services Group

presents

SOCIAL ENGINEERING

Dangers, Defenses and Strategies

Social Engineering is a cheap and easy way for unethical attackers to penetrate your institution's premises, systems and/or confidential data. Their biggest ally is the security naiveté and trusting nature of your employees. This information-packed seminar gives your employees the ability to recognize and thwart Social Engineering before it endangers your institution.

An Approach that Strengthens Your Institution's Information Security...

- The latest information delivered from a trusted source
- Material customized for your institution or specific employee populations
- Training conducted on-site, off-site, via WebEx or wherever its convenient for your employees
- Current techniques and trends highlighted for quick detection
- Q & A to ensure your employees are fully informed

Knowledge that Empowers Your Employees...

- Explanation of how and why Social Engineering is a clear but avoidable danger to your institution
- Real-world descriptions of the various types of Social Engineering
- Clues for spotting Social Engineering attacks
- Guidelines for dealing with attacks in progress
- Practical, affordable and effective techniques for preventing attacks

**Don't let the bad guys get the best of your employees. Educate them instead.
ATTUS RISC Services Group Training Seminars. Knowledge equals prevention.**
